

Jack M. Kartush, M.D.

CURRICULUM VITAE – Very Brief

January 15, 2007

POSITIONS

President - Michigan Ear Institute

President – American NeuroMonitoring, LLC

Medical Director - Otology, Neurotology
and Skull Base Surgery, Providence Hospital

Clinical Professor - Department of
Otolaryngology, Wayne State University, Detroit

EDUCATION

1970-1974

College

Michigan State University

1974-1978

Medical School

University of Michigan

Neurosurgery externship, 1977
Stockholm, Sweden

1978-1984

General Surgery and Otolaryngology Residency

University of Michigan

1984-1985

Fellowship - Otology, Neurotology & Skull Base
Surgery - University of Michigan

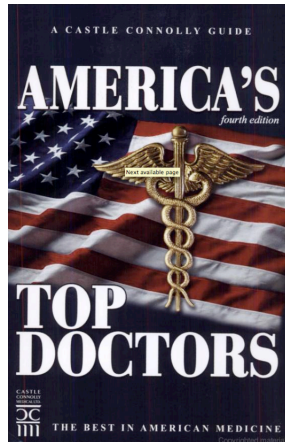

HONORS AND AWARDS

Pope John Paul II: *Special Apostolic Blessing* for Care of the Poor

Honor Award, American Academy of Otolaryngology, 1990

Cited in:

- 1. Best Doctors in America**
- 2. Best Doctors in Midwest**
- 3. Best Doctors in Michigan**
- 4. Metro Detroit's Best Doctors**

ELECTED OFFICES

<u>Founding President:</u>	American Society of Neurophysiological Monitoring (ASNM) (June, 1989)
President:	American Neurotology Society, 1996-1997
President:	Michigan Otolaryngology Society, 1991-1992

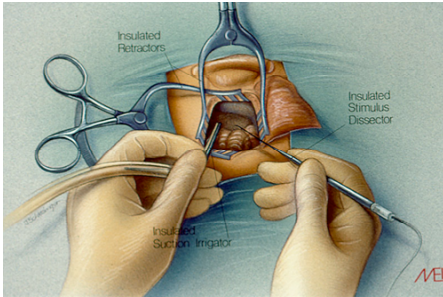

MUSIC

Composed and performed Opening Theme for:
FOX TV 10 O'Clock News: 1997 Lexington, Kentucky

Metro Times **MUSIC** Award: Detroit's **Best Guitarist and composer**
in "Rhythm and Blues" - 1982

SCIENTIFIC PUBLICATIONS

150 articles, chapters, books and videos.

**The standard-setting text on
intraoperative neuromonitoring
for safe surgery...**

Edited by
Jack M. Kartush, M.D. and Kenneth R. Bouchard, Ph.D.

"The authoritative text on neuromonitoring...All those who perform otological and/or head and neck surgery should own, or at least read, this book."

— *Annals of Otolaryngology, Rhinology, and Laryngology*

By showing otolaryngologists how intraoperative neuromonitoring can help reduce or prevent damage to nerves during surgery on the face, head and neck, this definitive, how-to-text has helped neuromonitoring evolve from relatively primitive roots to a sophisticated standard technique used in many medical centers.

A multidisciplinary volume, contributed to by experts in the fields of otolaryngology, neurology, and anesthesiology, details the principles of neurophysiologic monitoring and covers specific monitoring techniques to reduce the incidence of nerve injury whenever the facial nerve is at risk.

1992/272 pages/90 illustrations ISBN 0-88167-846-5

EDITORIAL RESPONSIBILITIES

Member - 10 Editorial Review Boards

SOCIETY MEMBERSHIPS

20 state, national and international societies

CONSULTANT TO INDUSTRY

Lasers, microscopes, NIH Consultant, Medicolegal Expertise

Full CV Available on request: 50 pages
